

BREAD-CRUSHER

The solution for difficult applications

With our bread crusher we offer you a dosing system for fully automatic feeding systems, which reliably dices and evenly doses coarsely structured components such as old bread or clumpy by-products. With the well-trying screw conveyors Type 160 and Type 200 the material to be conveyed can also be transported over long distances.

Important data at a glance:

- Storage volumes 3 to 30 m³
- All wetted contact parts are made of stainless steel
- Modular assembly design
- Power drive of tearing roller 3 kW and 4 kW
- Offset geared motors
- Discharge unit via screw conveyors Type 160 and Type 200
- Handling capacity up to 12 m³/hour

Tearing rollers made of stainless steel

The stainless steel tearing rollers supplies reliably shredded coarsely structured components or clumpy by-products.

Offset geared motors drive

Powerful offset geared motors ensure a problem-free and effective shredding of the components.

Discharge by screw conveyors

By connecting the bread crusher to our well-trying screw conveyors the shredded components can be easily transported even over long distances.

Flexible delivery by screw conveyors

Our special delivery technology enables us to transport the goods by screw conveyors in any direction. The screw technology is adapted to suit your circumstances on site.

Konrad Pumpe GmbH

Innovative technology plus experience.

AGRICULTURAL TECHNOLOGY

For more than 180 years, we have been closely following the developments and increasing demands of the agricultural industry. Our barn equipment and feeding systems are characterized by sophisticated functionality, individual concepts and the highest standards of quality and durability. Partnership is our foundation; reliability and professionalism are our recipe for success.

DOSING TECHNOLOGY

The transition to renewable sources of energy is opening up new perspectives for agricultural practices. We here at PUMPE are reliable partners to the energy farmers of tomorrow and offer innovative products and proven technology for biogas operators. From the design process, to manufacturing in our own production facilities, to installation and maintenance, we guarantee perfect service from a single source.

METAL TECHNOLOGY

Our origin is our expertise. Since 1830, we have been forging solid realities out of metal. With the latest technology and our years of experience, we are coming up with customized metal solutions for various applications in agriculture and industry. Custom-made solutions and in-house developments using steel and stainless steel is our passion.

Our service for your success

- Full service – from design and manufacturing to installation and service
- 365 days a year customer service for our clients
- Our own high bay warehouse and in-house production guarantee availability of all spare parts
- Quick reaction times and personal contacts
- Customized production and adaptations for individual specifications
- Close cooperation with our clients and consulting by our specialists
- Short distances and clear structures for perfect customer service
- Worldwide installation and maintenance of your equipment
- Quality and material "Made in Germany"
- A qualified staff that receives ongoing training guarantees the highest level of service
- More than 180 years of experience in the metal processing
- Owner-managed family company

Konrad Pumpe GmbH

- project engineering
- special machinery
- CNC sheet metal
- accessory and containers
- machinery and equipment
- steel construction
- barn equipment
- feeding systems for pigs
- dosing technology for biogas plants
